HEALTH CARE PRODUCTS

A diverse range of practical and ergonomic health care equipment. Solutions off the shelf and customised for today's busy health professional.

Combining the best of today's design and manufacturing technologies for use by tomorrow's professional Health Care providers.

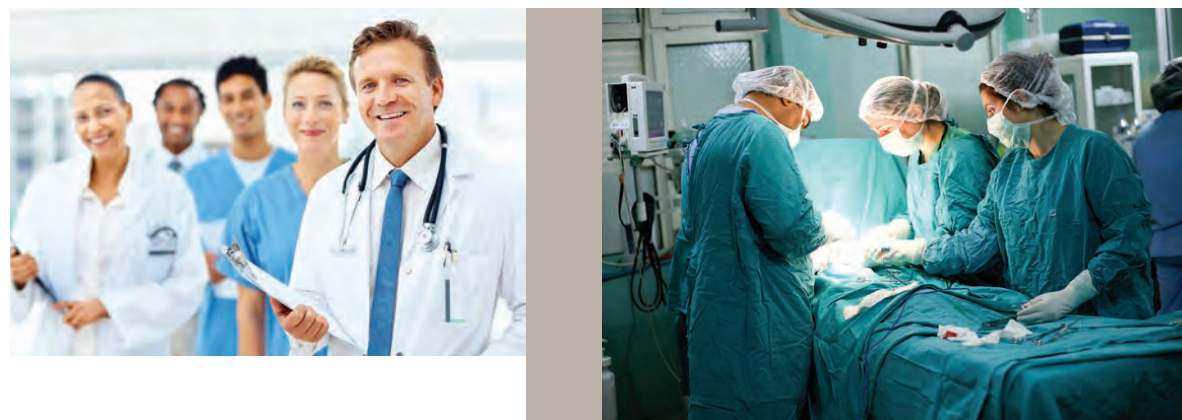

- Secure and Robust
- Easy to Install
- Simple in Design
- Efficient, Durable and User friendly

The Cable Ways, Health Care Product division has grown from a local request, to supply quality manufactured goods, built in New Zealand. Starting with our first product, a monitor trolley, this range quickly blossomed into a family with six variations. The range has expanded to include other daily use items with ongoing product development continuing to add new features which aid and simplify product use.

Today, the Health Care Product division undertakes custom designs covering a variety of hospital and clinic disciplines. Our vision sees the Health Care division progressively manufacturing more 'Kiwi-made' items, which are currently imported into New Zealand. With Cable Ways, twenty two years of experience in design and manufacturing, we are bringing value and reliability into our country's Health Care system.

Our primary mission statement is to pursue excellence and become the preferred supplier into an area of our endeavor. This keeps our feet firmly planted in a disciplined and proactive environment.

We are actively seeking opportunities to participate in the "kiwi-isation" of imported products and look forward to partnering with government and private Health Care professionals.

Monitor Swing Arms

Designed and built in NZ, these monitor swing arms have a long life high-density textured polyester based powder coat that complies with medical requirements, with a cable management system attached. The Swing Arm monitor brackets are available in two options to suit your requirements.

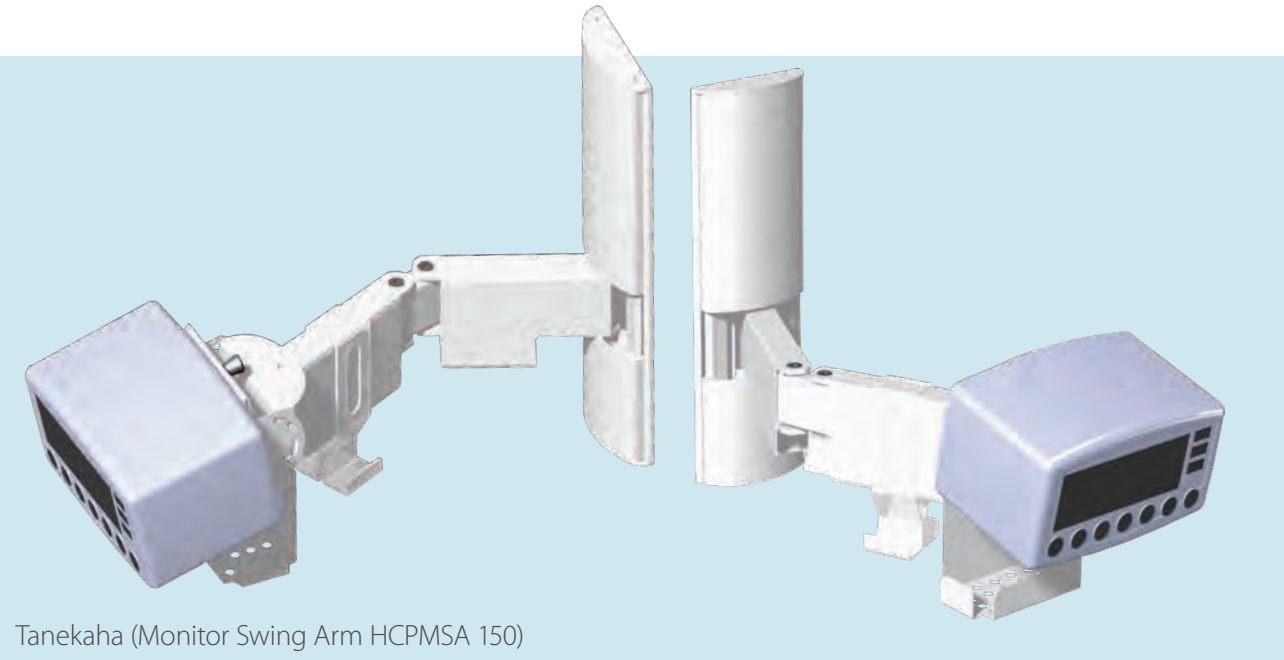

- Fast and easy to install
- Fully assembled with extensive screw kit
- Strong and secure
- Suitable for a monitor weight of < 12 kg

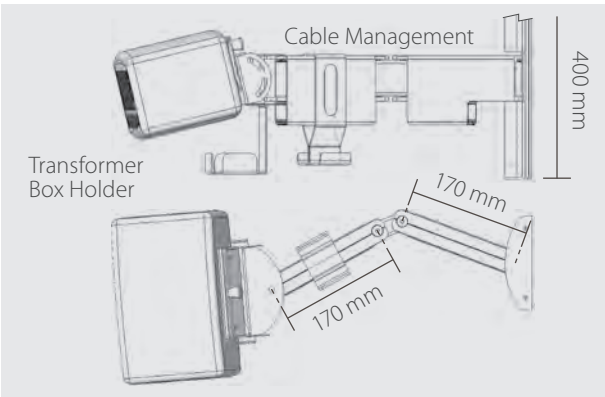

Monitor Swing Arms

All Monitor Swing Arms are available in black/silver or white and custom colours to suit.

- Fast and easy to install
- Fully assembled with extensive screw kit
- Strong and secure suitable for larger monitors < 20 kg

Presentation Station

Designed and built in New Zealand, this presentation/teleconference trolley allows quick setup on a stable platform using large diameter castors for easy lift and inter-room movement. The unit has a top mounted camera shelf and incorporates an equipment shelf with an additional lift out laptop shelf for local presentations. Integrated trolley handles allow simple movement in confined spaces and the bifurcated vertical extrusion frame allows convenient cable management and storage. Suitable for 32 to 50" landscape mounted displays. An intrigal locking clamp secures the screen to the stand, substantially increasing security.

HCPMTHD1	Monitor Trolley - Heavy Duty Base - 1 Basket - Mahoe
HCPMTHD2	Monitor Trolley - Heavy Duty Base - 2 Baskets - Pohutakawa
HCPMTHD3	Monitor Trolley - Heavy Duty Base - 1 Basket - Nikau (Dash 3000)

Universal wall, ceiling and floor mounting systems for hospitals

Fixed Display Wall Mount

This well proven standard mount provides exceptional holding power, exceeding 100 kg, whilst only needing a mounting lift of 15mm and a wall offset of 30mm. Screen fixing centres between 200 < 725mm horizontally and 100 < 425mm vertically.
Secure option: An auxiliary locking bar may be optionally purchased to enhance theft resistance: "It makes it really hard to steal" Available in Black and Silver.

Product Code **OMDWF-B/S-700**

Tilt Display Wall Mount

This secure tilt mount fits, all screens with fixing centres between 200 < 590mm horizontally and 200 < 390mm vertically. A choice of fixed angles allows optimized positioning without creepage. Ideal for high mounted applications where access is limited. Loads up to 50kg.
Available in Black or Silver

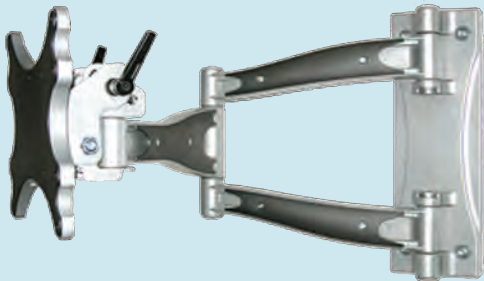

Product Code **OMDWT-B/S-700**

VESA Swing Wall Display Mount

Double swing tilt arm for VESA 100/200 mounting centres. Suits 32" < 50" displays up to 45kg, fast install, fully assembled with extensive screw kit, strong and secure, small wall offset of 128mm when closed, 680mm fully open.

Product Code **OMDWA300**

Telescopic Ceiling Display Mount

Suitable for commerical applications. This single tilt ceiling mount, suits screen attachments; 72 < 426mm horizontally and 70 < 330mm vertically. Loads up to 30 kg. The extendable telescopic pole allows flexibility of screen position for a variety of ceiling heights or user adjustable to suit audience needs.
Available in Silver.

Product Code **OMDCX-S**

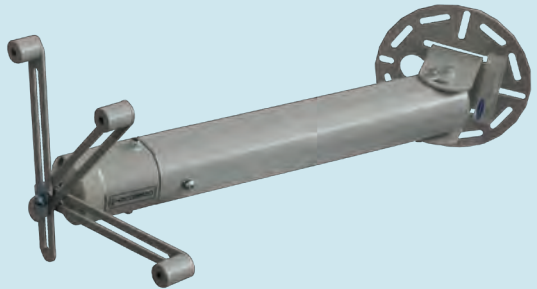

Standard Telescopic Ceiling Mount

Appropriate to the boardrooms, convention centres, schools or home theaters. This family of 60mm diameter telescopic extrusions, provides a professional solution with a hidden height clamp. It's top plate allows attachment to sloping ceilings and trusses without packing.

Simple adjustment of the 3 arms (3mm) allow attachment to all projector fixings within a 335mm diameter circle.
Rated load < 12kg.

Extrusion cable cover & ceiling penetration cover included.

Product Code: # = Colour choice. **W** - white, **S** - silver, **B** - black
S = Standard mount - 3 Arm, load < 12kg

OMJCX-#-(050) S 500 < 770mm drop

Maltron ergonomic and special needs keyboards

The **MALTRON** keyboard has been shown to relieve the symptoms of RSI (Repetitive Strain Injury) and CTS (Carpal Tunnel Syndrome) in hundreds of cases and has enabled many RSI and CTS sufferers to resume their careers.

MALTRON adaptive keyboards are designed to allow people with special needs to enter computer data much more easily and quickly than with conventional keyboards.

The keyboards also come in alternative language letter layouts, some of the language layouts include Canadian-French, English UK, English USA, French, German, Norwegian, Spanish and Swedish.

Dual Handed USB Keyboard

These fully ergonomic two handed keyboards fit the shape of hands and the different lengths of fingers to reduce movement and tension.

Over 2000 keyboard users have now successfully used a standard Maltron two handed, fully ergonomic keyboard to recover from keyboard induced pain.

Split design eliminates wrist twist and allows a central number cluster which can be used by right or left hand as preferred.

Tilted keys and pads minimise palms downward movement for further reduce muscle tension.

Straight vertical key columns eliminate tens of thousands of finger and wrist twists in a day's work.

Built in large palm resting pads allow immediate hand and arm relaxation.

L89 Type USB Two-handed Keyboard
J89 Letter Layout Two-handed Maltron Keyboard

Dual Handed USB Trackball Keyboard

A version of the fully ergonomic E-Type MALTRON keyboard with an integrated trackball in the central palm rest.

In the position the ball may be easily moved by the thumb with the fingers cupped and the hand resting over the key thumb group. The top of the ball is slightly below the palm rest surface so that it does not interfere with normal keyboard use.

The central location of the trackball enables either thumb to be used with the wrist kept straight and the hand tilted outwards in the comfortable position.

E Type PS/2 Two-handed Keyboard

Single Handed Keyboard

MALTRON single handed keyboards have been developed as a logical step forward to meet the needs of those who must perform keyboard operations with one hand.

The shape matches natural hand movement and the key arrangement minimizes finger movement, raising speed and relieving frustration.

Word-processing input speeds of 85 words per minute have been demonstrated.

The fully ergonomic shape ensures freedom from strain and no RSI type problems have been reported in over 10 years, although all the work is done by one hand.

Both Left and Right hand models are designed for "Touch Typing".

Self paced training manuals ensure quick, easy learning. Both screen and paper based versions are available.

Left Handed Keyboard

Right Handed Keyboard

Mouth Head Stick Keyboard

Push-On, Push-Off keys are provided for Shift, Control and Alt. MALTRON keyboards all have the ability to turn off key repeating at the keyboard if it is not wanted. If allowed by the software in use, the repeat rate can be set to SLOW, MEDIUM or FAST at the keyboard.

The shape matches natural head movement and the key arrangement minimises finger or stick activity, raising speed and relieving frustration.

An optional articulated arm holds the keyboard in almost any position to suit the head or mouth stick use.

Expanded Keyboard with Integral Key-guard

The MALTRON EXPANDED keyboard has been robustly designed with a strong steel construction to withstand heavy use, and a nylon coating for a smooth wipe-clean surface. It provides enhanced access for physically disabled and visually impaired users.

Extra SPACE keys for easier access, sticky shift keys - these keys remain active until another key is pressed, eliminating the need to use two hands. Indicator LEDS's - All Control, Alt Shift and Lock keys have lights to inform the user of status.

A Shift Lock key - this key is provided to allow the shift function to be locked on, variable repeat rate - allows the repeat rate to be turned off, or set at one of three speeds via the keyboard, subject to the software.

Extra keyboard socket - allows a standard keyboard to be connected to the expanded keyboard, and then used alongside simply by toggling a switch.

Hospital Accessories

Trans Slides

Trans Slides are an essential part of hospital equipment in the operating rooms, wards, emergency departments, radiology, oncology etc. Trans Slides are an effective, safe and efficient way of transferring patients and reducing the risk of injury to nurses.

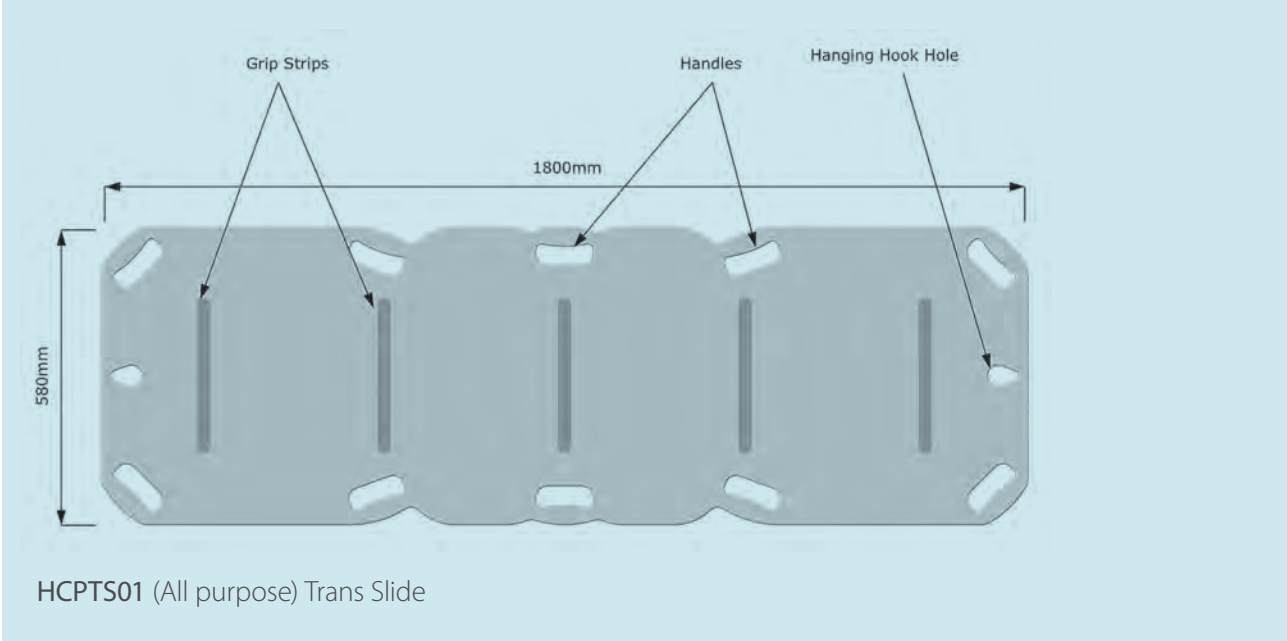

Trans Slide Benefits

- Effective and safe
- Lightweight
- Easy to use and clean
- Resilient
- Radio-lucent
- Highly impact tolerant
- Available in 3 different models

Specifications

Model	Length	Width
HCPTS01 (All purpose)	1800	580
HCPTS02 (Theatre)	1525	560
HCPTS03 (Slim)	1400	480

Test Tube Racks

Test Tube Racks moulded in ABS (Acrylonitrile Butadiene Styrene) are quite compact autoclavable and can hold 10, 12, 14, 16 mm tubes.
Test Tube Racks are an essential part of laboratory equipment, especially in the microbiology and immunology labs.

- Easy to use and clean
- Highly impact tolerant
- Available in different models
